### **Strategic Alliance**

1. Linda told us the purpose of the Strategic Alliance (SA) is to create friendly partnerships among organizations and businesses having a philosophy similar to the United Nations
2. There are no binding commitments that are expected from those organizations that are part of the SA
3. Organizations support each other by publicizing, co-sponsoring (not necessarily with money) and/or participating in events of others
4. The SA website advertises and supports initiatives and programs among member organizations and businesses
5. Linda emphasized that WAPJ is doing the work of the UN's global initiative on the local level even if we don't fully realize it
6. There are 169 UN human rights and development "targets" and similar goals have been happening in this area
7. After Linda spoke at Westerly High School to create awareness of the work the UN is doing, a lot of excitement was generated, one student spoke of the possibility of creating

connections and similar goals that align with UN targets among the 40 clubs that students take part in

8. Concern was expressed about the possibility that not every organization and business would be in agreement about being associated with a particular event; Linda replied that an event or activity that is political in nature (such as support or not for Israel regarding the War in Gaza) would not be publicized and supported and that she would be the one to make a judgement on what would or would not be allowable
9. Linda's goal is to promote is to promote Westerly as a hallmark community, a blueprint for rest of country for how to bring the goals and methods of the Young Global Leadership Foundation to the local level. <https://www.yglf.org>
